

# SA2045 Original Monologue

## The Importance of inventions

-by Doe Yoon Eddie Lim

Intro: Hello my name is Eddie Lim and I will be talking to you about the importance of inventions.

Have you ever thought of a world without inventions that we always use? Now, all of those things that you can imagine have vanished. Now, the only ones that are on Earth are humans, and the land of Earth. What would you do?

Today on this land of Earth, I, the boy who came from 35000 years ago, will introduce you to the timeline for the inventions. and life with the useful things. and for the

First, I will introduce the timeline for the inventions. The first invention was made 3.5 million years ago which was the tipping point for our history. From then, people started to make inventions that they thought were useful to them. Technically, the first invention that they discovered was fire. By the time humans used fire to cook and defend themselves, it had taught people how to use an item to do

anything that they wanted to do. As the technology developed, the people wanted to live comfortably. And there was a point where they were wheels at first but, eventually after all, they had developed itself into a car.

The solution: how to be creative
