

The Game Changer For All Writers

By Marcus Luo

Are you tired of chalk dust? Are you tired of pens exploding? Are you tired of your genius ideas not making it onto paper because of these stupid writing utensils?

At Der Longen Schtick, we've created exactly what you need to attract mountains of publishers and readers by the millions! Our product will help you write and erase your thoughts—even after you've written them down! And guess what? It's cheaper than chalk and infinitely more effective than your exploded pen collection.

Would you like to know what it is? It's a pencil! This stick can write extraordinary books, heighten your creative power, and scribble marks on a page!

But first, let me tell you the miraculous story of this incredible invention. My eccentric alchemist friend, Sir Scribbleton, tried to turn graphite into gold (greedy, greedy man, you know). One day, his cat, Sir Scribbleton the Sixth, was playing with a failed experiment near a piece of paper, and voilà—the pencil was born! The cat pranced over the paper with graphite shavings on her paws and wrote "P.S.!" She knew how to spell pspspspsssss. The graphite made her an Einstein. Immediately, Sir Scribbleton realized his invention's writing capacity could CHANGE THE WHOLE WORLD. It was a historic invention!

Now, let's talk about why pens and chalk are the bane of your existence. Pens are a pain in your wallet. The ink spills, leaves disdainful blobs, rips your pricey paper, and lasts—let's be honest—long *enough for a day*. And chalk? Don't get me started. It's dusty, messy, and just as revolting as pens. The sound of chalk screeching on a chalkboard is straight out of a horror movie.

But the pencil? It solves *everything*:

- Zero spillage
- Zero marks on your desk or hands
- Zero budget issues
- Zero dust
- Zero problems

Imagine writing 100 pages with just one pencil, an eraser, and a sharpener. Sounds impossible? Not with our starter pack: 3 pencils, an eraser, and a sharpener for just a dime.
